Invesco Fund Managers Limited is the Alternative Investment Fund Manager (the 'Manager') of the product and is authorised and regulated by the Financial Conduct Authority.

This Key Information Document is accurate as at 25 March 2026.

What is this product?

Type

Invesco Global Equity Income Trust plc (the "Company") is a UK closed-ended investment trust whose shares are traded on the London Stock Exchange.

Objectives

- The Company aims to provide an attractive level of predictable income and capital appreciation over the long term, predominately through investment in a diversified portfolio of equities worldwide.
- The Company is actively managed within its objectives and is not constrained by a benchmark.
- The Company borrows money to invest in the stock market within prescribed limits with the aim of enhancing return.
- The Company may use derivatives (contracts whose value is linked to the value of an underlying investment) with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The Company may enhance dividends on the Company by making use of its ability to distribute capital profits. Where this facility is used this will reduce capital growth.
- The Net Asset Value (NAV) return of the Company corresponds directly to the performance of the securities in which it invests and the income from them. The share price, which will determine the return to the investor, will also be affected by supply and demand. Consequently, the return to the investor may be higher or lower than the underlying NAV return.
- At any given time, the price you pay for a share will typically be higher than the price at which you could sell it.

Intended Retail Investor

The Company is intended for investors aiming for income and capital growth over the long term, who may not have specific financial expertise but are able to make an informed investment decision based on this document, the AIFMD investor information document and most recent Annual and Half-Yearly Financial Reports, have a risk appetite that is consistent with the risk indicator displayed within this document and understand that there is no capital guarantee or protection (100% of capital is at risk).

Term

The Company does not have a fixed life and can only be closed with shareholders' consent.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 4 out of 7, which is a medium risk class.

This figure rates the likelihood of losing money in the future at a medium level.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The product invests in emerging and developing markets, where difficulties in relation to market liquidity, dealing, settlement and custody problems could arise.

The use of borrowings may increase the volatility of the NAV and may reduce returns when asset values fall.

The product may use derivatives for efficient portfolio management which may result in increased volatility in the NAV.

A more detailed description of risk factors that apply to this product is set out in the latest Annual Financial Report.

Investment performance information

The return to the investor depends on the performance of the shares of the Company.

As the shares are traded on the London Stock Exchange, the share price depends on both the supply and demand for the shares of the Company and the NAV of the Company. Consequently, the return to the investor may be higher or lower than the return of the Company.

The Board of the Company will authorise the issue or buy back of shares with a view to maintaining the mid-market share price at close to the Company's net asset value.

The return of the Company depends on: (i) the performance of the individual shares of the companies held within the Company and the income they generate; and (ii) the extent to which the Company borrows money to invest in the stock market.

The individual shares of companies invested in are determined by the portfolio manager, based on their view of the future performance of those shares.

Capital growth will be reduced to the extent that the Company pays out a dividend out of its capital profits.

Given the Company's global equity focus, the most relevant benchmark for the purpose of comparing performance is the MSCI World Index (£) Total Return. However, as the Company is actively managed and is not constrained by the benchmark, the performance and volatility of the Company will not be the same as that of the benchmark.

What could affect my return positively?

Your return may be positively affected by an increase in the value of the shares of companies the Company is exposed to as a result of good general economic conditions, or positive market specific events or positive events specific to an individual company or group of companies.

What could affect my return negatively?

Your return may be negatively affected by a decrease in the value of the shares of companies the Company is exposed to as a result of:

poor general economic conditions, negative market specific events or negative events specific to an individual company or group of companies;

the specific risks described under the section entitled 'What are the risks and what could I get in return?' associated with investments in emerging markets, the use of derivatives for efficient portfolio management and the use of borrowings; and

variations in the strength of world currencies relative to Sterling.

In addition, if the demand for the Company's shares which are traded on the London Stock Exchange is low when you sell your investment, this can result in your return on the shares being lower than the return of the Company.

If you sell your investment in the Company under severely adverse market conditions, you are likely to make a loss or a very low return on your investment.

What happens if Invesco Fund Managers Limited is unable to pay out?

The Company's shares are listed on the London Stock Exchange. Should the Company be liquidated, the amount you receive for your shareholding will be based on the value of assets available for distribution (which will be distributed to all shareholders on a pro-rata basis) after all other liabilities have been paid. As a shareholder you will not be able to make a claim against the Company or Invesco Fund Managers Limited under the Financial Services Compensation Scheme in the event that the Company is unable to pay out dividends or liquidation proceeds.

What are the costs?

This document follows the FCA and HM Treasury interim rules from 19 September 2024, in respect of the disclosure of ongoing costs of underlying investments in investment trusts.

Further relevant information is disclosed in the Company's "Report and Accounts" and other documents which can be found on the Company's website or by clicking here.

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The figures assume you invest £10,000. The amounts shown exclude operating costs and expenses paid by the Company on the basis that the return that you may receive will depend on the Company's share price performance and there is no direct link between the Company's share price and the costs that it pays. The operating costs paid by the Company (with other investing factors) can affect the share price.

Interest expenses incurred by the Company and its portfolio of investments. The costs do not include any of the costs that you may pay to your adviser and / or distributor. The figures do not take into account your personal taxation circumstances, which may also affect how much you might recover from the sale of your shares.

Costs over time

The person advising you about this product and / or the product distributor may charge you other costs. If so, this person and / or distributor will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Example Investment: 10,000 £

Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of 5 years
Total costs	0.00 £	0.00 £	0.00 £
Impact on return (RIY) per year	0.00%	0.00%	0.00%

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	0.00%	We do not charge an entry fee for this product, but you may be charged by a third-party for facilitating your investment.
	Exit costs	0.00%	We do not charge an exit fee for this product, but you may be charged by a third-party for facilitating the sale of your investment.
Ongoing costs	Portfolio transaction costs	0.00%	The costs of buying and selling of underlying investments (Transaction Costs) are incurred by the Company. You do not pay the Company nor the investment manager for Transaction Costs. For more information on these costs, please refer to the Company's Annual Report and Accounts.
	Other ongoing costs	0.00%	The fees relating to the management or advisory fees are paid for by the Company. You do not pay the Company, the investment manager or other service providers fees relating to management or advisory fees. For further information on these fees, please refer to the Company's Annual Report and Accounts.
Incidental costs taken under specific conditions		0.00%	There is no performance fee for this product.
		0.00%	There are no carried interests for this product.

For more information on these costs, please refer to the Company's Annual Report and Accounts.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

There is no minimum or maximum required period for investors to hold shares in this product, but the shares may not be suitable for investors intending to hold them for less than 5 years.

You can sell some, or all, of your investment directly through a stockbroker, through an execution-only dealing service or if you invest through a provider of packaged products, through that provider, on any business day. The sale of your investment may be subject to dealing charges and taxes.

The sale price will be determined by the trading price at the time on the London Stock Exchange and will not necessarily be equal to the net asset value per share. There is no guarantee that the value of your shares will increase over the period you hold them for, and you may not get back the full value of your investment.

If you sell some, or all, of your investment before 5 years, you may increase the risk of receiving back less than you invested however, you will not incur any additional costs by doing so.

How can I complain?

You should contact the Head of our Contact Centre at Invesco Administration Centre, PO Box 586, Darlington, DL1 9BE, UK.

Other relevant information

The investor information document required under AIFMD provides you with key information about the product which you are advised to read so you can make an informed decision about whether to invest. This document together with the Annual and Half-Yearly Financial Reports, Company Announcements and other information is available on www.invesco.co.uk/investmenttrusts.
