What is this product?

Type

This product is a UCITS exchange traded fund or "UCITS ETF". It is a sub-fund of JPMorgan ETFs (Ireland) ICAV, an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between its sub-funds and authorised by the CBI pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

Objectives, Process and Policies

Objective The Sub-Fund seeks to provide returns that correspond to those of its Index.

Share Class Index Bloomberg China Treasury + Policy Bank + Liquid IG Credit Issuers Index

Investment Policy The Sub-Fund pursues a passively managed (index-tracking) strategy.

The Sub-Fund aims to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

The Index is comprised of CNY-denominated fixed rate bonds that have been issued by the PRC government, PRC government-related banks (known as "policy banks" such as the China Development Bank and the Agricultural Development Bank of China) and investment-grade PRC local authorities, agencies and corporate issuers (the "Index Securities").

In order to seek to achieve the Sub-Fund's investment objective, the Investment Manager will aim to replicate the Index by investing in Index Securities and issues comprising the Index. As far as possible and practicable, the Investment Manager will aim to invest in issuers in a similar proportion to that of the Index. It may not be possible for the Sub-Fund to invest in every Index Security and the Sub-Fund may invest in bonds not in the Index (but with the same characteristics and risk profile as the Index Securities) of issuers comprising the Index. As a result, the Sub-Fund may only hold a certain sub-set of Index Securities.

Although the Index is generally well diversified, due to the nature of the market which the Index reflects, it may have a higher concentration in certain constituents at any one time. In particular, in order for the Sub-Fund to track the Index accurately, the Sub-Fund will make use of the increased diversification limits available under Regulation 71 of the UCITS Regulations. These limits permit the Sub-Fund to hold positions in individual constituents of the Index issued by the same nongovernmental issuer of up to 20% of the Sub-Fund's Net Asset Value and up to 35% of the Sub-Fund's Net Asset Value in one particular nongovernmental issuer.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

The Sub-Fund will invest in assets denominated in CNY and currency exposure will not typically be hedged.

USD is the base currency of the Sub-Fund.

It is currently anticipated that the tracking error of the Sub-Fund will be up to 200 bps under normal market conditions. The causes of tracking error can include but are not limited to the following: holdings, size of the Sub-Fund, cash flows, such as any delays in investing subscription proceeds into the Sub-Fund or realising investments to meet redemptions, fees and the frequency of rebalancing against the Index.

The Sub-Fund will publicly disclose its complete holdings on a daily basis. Details of the Sub-Fund's holdings and full disclosure policy may be found on www.jpmmorganassetmanagement.lu.

This Share Class seeks to minimise the effect of currency fluctuations between the currency of certain (but not necessarily all) assets of the Sub-Fund and the Reference Currency of this Share Class (GBP).

Redemption and Dealing Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Distribution Policy This Share Class does not pay dividends. Earned income is retained in the Net Asset Value.

SFDR Classification Article 6

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years.

- Investors should understand the risks involved, including the risk of losing all capital invested and must evaluate the Sub-Fund objective and risks in terms of whether they are consistent with their own investment goals and risk tolerances. The Sub-Fund is not intended as a complete investment plan.
- Typical investors in the Sub-Fund are expected to be investors who want to take exposure to CNY-denominated debt securities and are prepared to accept the risks associated with an investment of this type, including the volatility of such market.

Term This product does not have a fixed maturity date and may be liquidated in certain circumstances, as further detailed in the Prospectus.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you. The risk of the product may be significantly higher if held for less than the recommended holding period.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Beside the risks included in the risk indicator, other risks materially relevant for the product may affect its performance. Please refer to the relevant supplement, available free of charge at www.jpmorganassetmanagement.lu.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 2022 and 2025.

Moderate: this type of scenario occurred for an investment between 2019 and 2024.

Favourable: this type of scenario occurred for an investment between 2017 and 2022.

What happens if JPMorgan Asset Management (Europe) S.à.r.l. is unable to pay out?

JPMorgan Asset Management (Europe) S.à.r.l. is responsible for administration and management of the Sub-Fund and does not hold assets of the Sub-Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). JPMorgan Asset Management (Europe) S.à.r.l., as

the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Sub-Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- £ 10,000 is invested.

Example Investment £ 10,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	£ 41	£ 240
Annual cost impact*	0.4%	0.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.9% before costs and 3.9% after costs.
