1. What is this product ?

Product Type : The Fund is a passively managed Undertakings for Collective Investments in Transferable Securities (UCITS) in the form of an Exchange Traded Fund (ETF) under Irish law, constituted as a sub-fund of an Irish Collective Asset-management Vehicle (ICAV).

Maturity : This product has no specific maturity date. However, this product may be dissolved or merged, in which case you will be informed by any appropriate means provided for by the regulations.

Objectives : The investment objective of OSSIAM BLOOMBERG CANADA PAB UCITS ETF fund (the "Fund") is to replicate, before the Fund's fees and expenses, the performance of the Bloomberg PAB Canada Large & Mid Cap Net Return Index (the "Index") closing level. The Fund is a financial product that pursuant to Article 9(3) of the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR Regulation"), has as its sustainable investment objective the reduction of carbon emissions by replicating the Index. The Index is a Bloomberg Global Equity Paris-Aligned Index, which aims to provide (i) a relative decarbonization, with a long term return, by investing in an equity portfolio seeking at least a 50% greenhouse gases (GHG) intensity reduction, compared to its parent index, here the Bloomberg Canada Large & Mid Cap Index (the "Parent Index"), and (ii) a self-decarbonization, with per year at least 7% GHG intensity reduction on average. The Index is expressed in the Canadian dollar (CAD). The anticipated level of tracking error in normal conditions is 1.00% over a one year period. The Index is calculated and published by Bloomberg (the "Index Provider"). For a detailed description of the Index, see section "Description of the Index" in the Prospectus.

Investment Policy : In order to achieve its investment objective, the Sub-Fund will primarily invest, through physical replication, in all or part of the equity securities comprised in the Index and in substantially the same weights as in the Index. The Sub-Fund may hold only part of the Index Securities where full replication of the Index is not reasonably practical (for example as a result of the non-significant weight or the illiquidity of certain securities within the Index) or where it is not possible to comply with the constraints described in the "Index Methodology" section of the Prospectus. Even in these circumstances, the Sub-Fund will remain an Index Tracking Sub-Fund and, as such, will seek to replicate, before the Sub-Fund's fees and expenses, the performance of the Index. The Sub-Fund will replicate the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to maintain under 1.00% the level of the tracking error between the Sub-Fund's performance and that of the Index. Although the Index is generally well diversified, because of the market it reflects it may, depending on market conditions, contain constituents issued by the same body that may represent more than 10% of the Index. In order for the Sub-Fund to track the Index accurately, the Sub-Fund will make use of the increased diversification limits available under Regulation 71 of the UCITS Regulations. These limits permit the Sub-Fund to hold positions in individual constituents of the Index issued by the same body of up to 20% of the Sub-Fund's Net Asset Value. The Base Currency of the Sub-Fund is the Canadian Dollar (CAD).

Allocation of distributable amounts : Capitalization.

Intended Investors : The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund.

Depositary : Caceis Bank, Ireland branch.

Additional information : The Fund's prospectus and annual and semi-annual reports are available on the management company's website and free of charge on written request to info@ossiam.com. The net asset value is available on the management company's website. www.ossiam.com

Composition of costs

This table shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

* Secondary Market: because the Fund is an ETF, Investors who are not Authorized Participants will generally only be able to buy or sell shares on the secondary market. Accordingly, investors will pay brokerage fees and/or transaction costs in connection with their dealings on stock exchange(s). These brokerage fees and/or transaction costs are not charged by, or payable to, the Fund nor the Management Company but to the investor's own intermediary. In addition, the investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold.

Primary Market: Authorized Participants dealing directly with the Fund will pay related primary market transaction costs.
