The Commission de Surveillance du Secteur Financier (CSSF) is responsible for supervising Ossiam with regard to this Key Information Document.

Ossiam is registered in France under n°GP-10000016 and regulated by the AMF.

Date of production : 31/12/2025

1. What is this product ?

Product Type : The Fund is a passively managed Undertaking for Collective Investment in Transferable Securities (UCITS) in the form of an Exchange Traded Fund (ETF) under Luxembourg law, constituted as a sub-fund of a Société d'Investissement à Capital Variable (SICAV).

Maturity : This product has no specific maturity date. However, this product may be dissolved or merged, in which case you will be informed by any appropriate means provided for by the regulations.

Objectives : The Fund's objective is to replicate, before the Fund's fees and expenses, the performance of the Shiller Barclays CAPE® US Sector Value Net TR Index closing level. The Shiller Barclays CAPE® US Sector Value Net TR Index (the "Index") is a total return index (net dividends reinvested) expressed in USD, sponsored by Barclays (the "Index Provider"), and calculated and published by Bloomberg Index Services Limited (the "Calculation Agent"). For a detailed description of the Index, see section "Description of the Index" in the Prospectus. The anticipated level of tracking error in normal conditions is 0.50% over a one-year period.

Investment Policy : In order to achieve its investment objective, the Fund will primarily use swaps with the objective of tracking the Index performance through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance of which will be exchanged against the performance of the Index or a related index, or a portfolio of its constituents through swap agreements with a swap counterparty. This method implies a counterparty risk as described in the Risk and Reward Profile section in the Prospectus. The net asset value per Share of the Fund will therefore increase (or decrease) according to the evolution of the Index. The counterparty to the swaps will be a first class financial institution that specialises in this type of transaction. The Fund may also enter into multiple swap agreements with multiple swap counterparties with the same characteristics as previously described. In case of synthetic replication, an index license contract may exist between the swap counterparty (ies) and the index provider; therefore, licensing fees may be included in the swap costs. The Fund may, with due regard to the best interest of its Shareholders, decide to switch partially or totally from synthetic replication (as described above) to physical replication. In both replication strategies, the Fund shall be permanently invested for a minimum of 60% in equities or rights issued by companies having their registered office in OECD countries. In addition and on an ancillary basis, the Fund may use other derivatives for hedging and investment purposes, as described under "Use of Derivatives, Special Investment and Hedging Techniques" in the Prospectus. The Reference Currency of the Fund is the US Dollar. In order to hedge against the euro (EUR) exchange rate risk on the HEDGED EUR share class, the Fund/Compartment applies a hedging strategy which reduces the impact of variations between the currency of the Index and the currency of the share class.

Allocation of distributable amounts : Capitalization.

Intended Investors : The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund.

Depository : State Street Bank International GmbH, Luxembourg Branch.

Additional information : The Fund's prospectus and annual and semi-annual reports are available on the management company's website and free of charge on written request to info@ossiam.com. The net asset value is available on the management company's website. www.ossiam.com

2. What are the risks and what could I get in return ?

Risk Indicator

The risk indicator assumes that you hold this product for 5 years. The real risk may be very different if you opt to exit before maturity, and you may get less in return. The risk indicator allows you to assess the level of risk of this product compared with others. It indicates the probability of this product incurring losses in the event of market movements or our inability to pay you.

We have classified the Fund in risk class 4, which is a medium risk class. In other words, the potential losses linked to the product's future results are at a medium level, and if the situation were to deteriorate on the markets, it is possible that our ability to pay you could be affected. The market liquidity risk could amplify the variation of product performances.

Beware of currency risk. If the sums paid to you are in another currency, your final profit will depend on the exchange rate between the two currencies. This risk is not taken into account in the above indicator. In addition to the risks included in the risk indicator, other risks may influence the Fund's performance. Please refer to the Fund's prospectus. As this Product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

Performance Scenarios

The figures shown include all costs of the product itself, but not necessarily all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

What you will receive from this product depends on future market performance. Future market trends are random and cannot be accurately predicted. The unfavorable, moderate and favorable scenarios presented represent examples using the best and worst performances, as well as the average performance of the product over the last 10 years. Markets may evolve very differently in the future. The stress scenario shows what you could achieve in extreme market situations.

		1 year	5 years (recommended holding period)
Stress Scenario	What you might get back after costs	EUR 4 275	EUR 2 767
	Average return each year	-57.25%	-22.66%
Unfavourable Scenario	What you might get back after costs	EUR 8 198	EUR 14 180
	Average return each year	-18.02%	7.24%
Moderate Scenario	What you might get back after costs	EUR 11 177	EUR 17 537
	Average return each year	11.77%	11.89%
Favourable Scenario	What you might get back after costs	EUR 16 007	EUR 21 939
	Average return each year	60.07%	17.02%

Unfavourable Scenario:

This type of scenario occurred for an investment between 29/12/2017 and 30/12/2022

Moderate Scenario:

This type of scenario occurred for an investment between 29/03/2019 and 28/03/2024

Favourable Scenario:

This type of scenario occurred for an investment between 31/03/2020 and 31/03/2025

3. What happens if the Issuer is unable to pay out ?

The product is a co-ownership of financial instruments and deposits separate from the portfolio management company. In the event of the latter's default, the product's assets held by the custodian will not be affected. In the event of the custodian's default, the risk of financial loss to the product is mitigated by the legal segregation of the custodian's assets from those of the product.

4. What are the costs ?

The person selling or advising you on this Fund may ask you to pay additional costs. If this is the case, they will tell you about these costs and show you how they affect your investment.

Cost over time

	Total Cost	Impact on return (RIY) per year*
If you cash in after 1 year	EUR 65	0.65%
If you cash in at the end of the recommended holding period	EUR 516	0.58%

The tables show the amounts deducted from your investment to cover the various types of costs. These amounts depend on the amount you invest, the period of time you hold the product and the product's performance. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed :

- That in the first year you would get back the amount you invested (0% annual return). That for the remaining holding periods, the product evolves as indicated in the moderate scenario.
- EUR 10,000 invested

*This illustrates the extent to which costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per annum is expected to be 12.47% before deducting costs and 11.89% after deducting costs.

Composition of costs

This table shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

			If you cash in after 1 year
One-off costs	Entry costs*	Up to 0.00% of the amount you pay when entering this investment.	EUR 0
	Exit costs*	Up to 0.00% of the amount you pay when exiting this investment.	EUR 0
Ongoing costs	Portfolio transaction costs	0.00% of the value of your investment per year.	EUR 0
	Other ongoing costs	0.65% of the value of your investment per year.	EUR 65
Incidental costs	Performance fees	There is no performance fee for this product.	---
	Carried interests	There is no carried interest for this product.	---

* Secondary Market: because the Fund is an ETF, Investors who are not Authorized Participants will generally only be able to buy or sell shares on the secondary market. Accordingly, investors will pay brokerage fees and/or transaction costs in connection with their dealings on stock exchange(s). These brokerage fees and/or transaction costs are not charged by, or payable to, the Fund nor the Management Company but to the investor's own intermediary. In addition, the investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold.

Primary Market: Authorized Participants dealing directly with the Fund will pay related primary market transaction costs.

5. How long should I hold it and can I take my money out earlier ?

Recommended holding Period : 5 Years.

This product has no required minimum Recommended Holding Period (RHP) but is designed for long term investment. Any investment should be considered according to your specific investment needs and appetite for risk. Ossiam does not consider the suitability or appropriateness of this investment for your personal situation. If you are in any doubt about the suitability of this product to your needs, you should seek professional advice. You can buy or sell your ETF securities daily on the secondary market through an intermediary on Stock exchange(s) on which the ETF securities are traded.

Processing requests :

Subscription and redemption orders are received no later than 3:00 p.m. (Luxembourg time). For further information, please refer to the Prospectus and/or contact your broker.

6. How can I complain ?

You may make a complaint about the product or the conduct of (i) the Management Company (ii) a person who provides advice about the product, or (iii) a person who sells the product by sending an e-mail or a letter to the following persons, as appropriate :

- If your complaint concerns the product itself or the conduct of the Management Company : please contact the Management Company, by post, at 36 rue Brunel 75017 Paris (France) for the attention of OSSIAM - Compliance or by e-mail at info@ossiam.com. A complaints handling procedure is available on the management company's website www.ossiam.com
- If your complaint concerns a person who advises on or offers the product, please contact that person directly.

7. Other relevant information

SFDR Category : Article 6.
