## What is this product?

### Type

The product is an undertaking for collective investment in transferable securities (UCITS, fund) in accordance with the Investment Fund Act 2011 (InvFG). The Fund is a portfolio of assets with no legal personality that is divided into equal units represented by securities and that is collectively owned by all unit-holders.

### Term

The Fund was established for an indefinite period of time.

The Management Company may terminate the management of the Fund or merge the Fund with another fund, both in compliance with the applicable legal regulations (see the prospectus, section II, item 7). If the unit-holders redeem all units in the Fund, the Fund will also be terminated.

### Objectives

ERSTE WWF STOCK ENVIRONMENT is an equity fund. The Fund aims to achieve capital growth and/or continuous returns.

This unit category was issued for all investors without restrictions.

There is no minimum (initial) investment volume.

In order to attain the investment objective, the Fund invests predominantly, in other words at least 80% of its assets, in stocks from companies in the form of directly purchased individual instruments, in other words not indirectly or directly through investment funds or through derivatives. The Fund may only invest in transferable securities from companies that have been identified as providing a particular benefit to the environment on the basis of a predefined screening process and that have thus been classified as sustainable. Particular emphasis is given to the segments of water, renewable energy, energy efficiency, storage technology, mobility, air, and recycling. There are no restrictions with regard to the location of the registered offices of the selected issuers.

In total, this Fund invests at least 80% of its assets in investments used to meet environmental and/or social characteristics and/or sustainable investment objectives.

In addition, investments in companies that are listed in Article 12 (1) a to g of CDR (EU) 2020/1818 are excluded.

Detailed information on the predefined screening process can be found Section II, item 12 of the prospectus.

Units in investment funds may not be purchased.

Derivative financial instruments can be used as part of the investment strategy up to 20% of the fund assets and for hedging purposes.

The Fund employs an active investment policy and is not oriented towards a benchmark. The assets are selected on a discretionary basis, and the Management Company's degree of freedom is not limited.

Detailed information on the eligible investments can be found in Article 3 of the Fund Rules or Section II, item 12 of the prospectus.

### Intended retail investor

This product is intended for investors with basic knowledge and with no or only limited experience with investing in funds, who wish to increase the value of their investment over the recommended holding period and/or who are seeking regular returns, and who are also willing to accept a potential financial loss in terms of their originally invested capital.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you will keep the product for at least 6 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level. Poor market conditions will likely impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

**Please note potential currency risk. If you receive payments in a different currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

You do not have to make any further payments to cover losses.

In addition, there are material risks that are not taken into account in the summary risk indicator: credit, liquidity, operational, transfer, and custody risk as well as risk from the use of derivatives.

Comprehensive information on the risks of the Fund can be found in the prospectus, section II, item 12.

## What happens if Erste Asset Management GmbH is unable to pay out?

The Fund is a portfolio of assets that is segregated from the assets of the Management Company. There is thus no risk of default in terms of the Management Company (for example in the event that it becomes insolvent). The unit-holders are joint owners of the assets of the Fund.
