What happens if 21Shares AG is unable to pay out?

The manufacturer is a special purpose vehicle. In the case of default by the manufacturer the assets it holds as collateral may be realized in order to meet its obligations to investor and the cash proceeds of this will be paid out in the order of priority of payments applicable to the products. These proceeds may not be sufficient to meet all obligations and make all payments due in respect of the securities. In these circumstances you may not be able to realise the full value of your securities and suffer a loss on your investment. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: in 2027 you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
