What is this product?

Type	The Fund is a sub-fund of the Company. The Company has been established as a UCITS fund in Ireland.
Term	The Fund has no maturity date and is established for an indefinite term.
Objectives	The investment objective of the Fund is to increase the value of its investments over the long term. The Fund will predominantly invest, on a diversified basis, its assets in European equities and equity related securities. Investment focus will be on medium to small companies, measured by market capitalisation (the value of the issued shares of a publicly traded company). The Fund may perform derivative trades in order to hedge positions or to increase its returns. The Fund is actively managed with reference to the STOXX Europe Small 200 NR (EUR) as a performance measure. The Investment Manager has full discretion over the Fund's investments therefore the portfolio and performance may deviate significantly from the index. This Share Class is distributing in nature and may distribute on an annual basis. The Fund's assets are held with its depository, which is Brown Brothers Harriman Trustee Services (Ireland) Limited. The Prospectus and current reports, the current share prices and further information about the Fund or further Share Classes of the Fund can be found free of charge in English language on https://fondsfinder.universal-investment.com , as required by law.
Intended retail investor	The Fund is designed for investors who are capable of assessing the risks and value of the investment. The investor must be prepared and able to accept significant fluctuations in the value of the Shares, and the potential of a significant loss of capital. The assessment of the Manager should not be considered investment advice; instead, it is intended to provide the investor with an initial point of reference for determining whether the Fund is appropriate for their investing experience, risk tolerance and investment horizon.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. This product does not include any protection from future market performance so you could lose some or all of your investment. Historical data may not be a reliable indication for the future. The risk indicator category shown is not guaranteed to remain unchanged and the categorisation of the Fund may shift over time.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 Years

Example Investment: 10,000 EUR

		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	3,660 EUR	2,810 EUR
	Average return each year	-63.36%	-22.42%
Unfavourable	What you might get back after costs	6,220 EUR	7,580 EUR
	Average return each year	-37.82%	-5.38%
Moderate	What you might get back after costs	9,910 EUR	11,150 EUR
	Average return each year	-0.88%	2.19%
Favourable	What you might get back after costs	15,620 EUR	17,670 EUR
	Average return each year	56.21%	12.06%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario was based on an investment between 08/2021 and 10/2025. The moderate scenario was based on an investment between 05/2020 and 05/2025. The favourable scenario was based on an investment between 08/2016 and 08/2021.

What happens if the Manager is unable to pay out?

The failure of the Manager will have no direct impact on your payment, if the Manager becomes insolvent the Fund does not become part of the insolvency assets of the Manager, but rather remains separate. There is no public or private investor compensation scheme that can compensate for any losses due to the insolvency of the Company, the Manager or the Investment Manager.

What are the costs?

The person selling you this product or advising you on it may charge you other costs. If this is the case, this person will inform you of these costs (which shall also be provided free of charge in paper form) and explain how these costs will affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10,000 EUR is invested.

	<u>If you exit after 1 year</u>	<u>If you exit after 5 years</u>
Total costs	<u>797 EUR</u>	<u>2,087 EUR</u>
Annual cost impact (*)	8.0%	4.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.4% before costs and 2.2% after costs.

Composition of costs

<u>One-off costs upon entry or exit</u>		<u>If you exit after 1 year</u>
Entry costs	An entry charge of up to 5.0% of the amount you pay may apply when acquiring this investment. The amount indicated is the maximum rate. This may be lower in individual cases. You can request the amount actually applicable for you from the distributor of the Shares in the Fund.	Up to 500 EUR
Exit costs	0.0% (currently 0.0%) of your investment before it is paid out to you. The amount indicated is the maximum rate. This may be lower in individual cases. You can request the amount actually applicable for you from the distributor of the Shares in the Fund.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.6% of the value of your investment per year. The indicated costs were based upon the cost incurred during the last fiscal year of the Fund, which ended on 30/09/2025. The ongoing costs can fluctuate from year to year.	151 EUR
Transaction costs	1.5% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	146 EUR
Incidental costs taken under specific conditions		
Performance related fees	Fees linked to the performance of the Fund: 15.00% a year of any returns the Fund achieves above the benchmark for these fees, the STOXX Europe Small 200 NR (EUR). Any underperformance of the Fund compared to the benchmark is made good before the Investment Manager receives another performance fee. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last five years.	0 EUR

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Due to legal requirements, we are obliged to show the percentage figures with only one decimal place.

How long should I hold it and can I take my money out early?
