## ➤ What is this product?

**Type:** ICAV.

**Term:** No fixed term.

**Objectives:** The Investment Objective for AI-Enhanced Eurozone Equities UCITS ETF is to generate investment returns in excess of the Benchmark Index through stock selection and with a low tracking error relative to the Benchmark Index. The Sub-Fund is actively managed. The Sub-Fund seeks to achieve its investment objective by identifying stocks with upside potential that are not closely correlated with overarching systematic risk factors, such as the risks associated with country-specific fiscal policies, regulatory changes within industries or sensitivities to global market movements. The weight of a security within the Sub-Fund's portfolio is determined by both its expected return and estimates of its risk, with higher expected returns and lower risk resulting in a higher weight. The expected return forecast stems from AI forecasts, while an ex-ante risk estimate is derived from a global fundamental risk model. The investment strategy is driven by a holistic AI-driven stock selection model which predicts the monthly excess return for each stock in the investment universe of EMU equities.

The base currency of the Sub-Fund is EUR.

**Intended retail investor:** Typical investors in the Sub-Fund are expected to be investors who are seeking income and capital appreciation through exposure to Eurozone companies.

**Depositary:** The ICAV's assets are held through its Depositary, which is The Bank of New York Mellon SA/NV, Dublin Branch.

**Distribution type:** The product is distributing.

## ➤ What are the risks and what could I get in return?

### Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Example investment: EUR 10,000		1 year	5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	EUR 4,720	EUR 5,740
	Average return each year	-52.76%	-10.51%
Unfavourable scenario <sup>1</sup>	What you might get back after costs	EUR 8,130	EUR 9,230
	Average return each year	-18.66%	-1.59%
Moderate scenario <sup>2</sup>	What you might get back after costs	EUR 10,760	EUR 12,860
	Average return each year	7.61%	5.16%
Favourable scenario <sup>3</sup>	What you might get back after costs	EUR 14,270	EUR 18,980
	Average return each year	42.75%	13.67%

<sup>1</sup>This type of scenario occurred for an investment from 04/2015 to 04/2020.

<sup>2</sup>This type of scenario occurred for an investment from 06/2018 to 06/2023.

<sup>3</sup>This type of scenario occurred for an investment from 03/2020 to 03/2025.

## ➤ What happens if Carne Global Fund Managers (Ireland) Limited is unable to pay out?

The assets and liabilities of the ICAV are segregated from those of the PRIIP Manufacturer. The assets of the ICAV are held in safekeeping by the Depositary. In the event of the insolvency of the PRIIP Manufacturer, the ICAV's assets in the safekeeping of the Depositary will not be affected. In the event of the insolvency of the Depositary, you may suffer financial loss. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

## ➤ What are the costs?

### Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

Example Investment: EUR 10,000	If you cash in after 1 year	If you cash in after 5 years
Total costs	EUR 85	EUR 528
Annual cost impact(*)	0.85%	0.85%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.01% before costs and 5.16% after costs.

### Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

The table shows the impact on return per year		If you exit after 1 year	
One-off costs upon entry or exit	Entry costs	We do not charge an entry fee for this product.	EUR 0
	Exit costs	We do not charge an exit fee for this product.	EUR 0
Ongoing costs taken each year	Management fees and other administrative or operating costs	0.65% of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 65
	Transaction costs	0.20% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 20
Incidental costs taken under specific conditions	Performance fees and carried interest	There is no performance fee for this product.	EUR 0

## ➤ How long should I hold it and can I take my money out early?

**The recommended minimum holding period: 5 years.**

The Sub-Fund is suitable for investors with a medium and long-term investment horizon. This product has no prescribed minimum holding period. The recommended holding period is based either on historical data or on the manufacturer's assessment of the average expected fluctuation in the unit value of this product. If you as an investor have a shorter investment horizon, there may be a higher average risk that your redemption will take place when the unit value of the product is lower than when you invested. There are no costs or fees for redemptions. In principle, you can request redemption on any trading day. Further information can be found under "Duration" in the section "What type of product is this?".

## ➤ How can I complain?

If you have any complaints about the product, the conduct of the manufacturer or the person advising on the product, complaints can be lodged via the following methods:

E-mail: [complaints@carnegroup.com](mailto:complaints@carnegroup.com)

Mail: 3rd Floor, 55 Charlemont Place, Dublin, D02 F985, Ireland.
