## What is this product?

### Type

This is an open ended UCITS ETF.

### Term

The fund is established for an unlimited period. In certain circumstances the fund may be unilaterally terminated in accordance with legal requirements.

### Investment objective

The fund aims to provide capital growth and income in excess of the Solactive ISS ESG Screened Paris Aligned Global Markets (Net TR) Index after fees have been deducted over a three-to-five-year period by investing in equity and equity related securities of companies worldwide.

There can be no assurance that the fund will achieve its investment objective.

The fund is actively managed and invests at least two-thirds of its assets in a diversified portfolio of equity and equity related securities of companies worldwide. The fund's exposure to emerging markets will not exceed 30% of net assets.

The fund focuses on companies that have certain "Value" and/or "Quality" characteristics, with these two fundamental anchors driving active positioning. "Value" is assessed by looking at indicators such as cash flows, dividends and earnings to identify securities which the investment manager believes have been undervalued by the market. "Quality" is assessed by looking at indicators such as a company's profitability, stability, financial strength, structural growth and governance.

The fund may invest in common stock, preferred stock, real estate investment trusts (REITs) and partnership interests. The equity-related securities in which the fund may invest are depositary receipts (including American Depositary Receipts, Global Depositary Receipts, European Depositary Receipts, and Non-Voting Depositary Receipts), stapled securities (being a type of equity security that consists of two or more securities that must be bought and sold together), warrants and rights. The fund will not generally actively invest in warrants and rights but may acquire them as a result of corporate actions. The fund may invest in such other equity and equity-related securities that are consistent with the investment objective and policy of the fund from time to time.

The fund may invest directly in China B-Shares and China H-Shares and may invest less than 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The fund may invest in exchange traded funds that are Eligible Collective Investment Schemes.

The fund may invest up to one-third of its assets in short-dated government bonds, money market funds that are Eligible Collective Investment Schemes (with all Eligible Collective Investment Schemes subject to an aggregate limit of 10%), and term deposits with an Approved Bank for cash management purposes. The fund may also hold cash.

In relation to the fund's investment in REITs which will not exceed the weight in the Solactive ISS ESG Screened Paris Aligned Global Markets (Net TR) Index +3% of net assets, investments in eligible open-ended REITs will generally, for the purposes of this limitation, be considered to

be investments in Eligible Collective Investment Schemes and so subject to the limit on investing in units or shares of Eligible Collective Investment Schemes. Investments in closed-ended REITs will generally be considered to be investments in transferable securities, provided that the closed-ended REITs in which the fund may invest must: (i) be subject to corporate governance mechanisms which apply to companies or, in the case of contractual closed-ended funds, which are equivalent to those that apply to companies; (ii) be managed by an entity which is subject to national regulation for the purpose of investor protection; and (iii) satisfy the more general requirements that are applicable to transferable securities, and so subject to the fund's overall limits on investing in equity and equity-related securities as detailed in this section.

The fund will seek to qualify as an "Equity Fund" for German tax purposes by investing at least 50% of its gross asset value in equity securities. For further information, please refer to the prospectus.

The fund may use the following financial derivative instruments with the aim of reducing risk and managing the fund more efficiently: equity index futures, currency forwards, currency futures and non-deliverable forwards. The financial derivative instruments used by the fund may be traded on an exchange or over the counter.

**Recommendation:** Investors should seek independent advice or satisfy themselves that they have an understanding of the strategies and techniques employed by the manager.

**Benchmark:** The fund's performance should be assessed against its benchmark, being the Solactive ISS ESG Screened Paris Aligned Global Markets (Net TR) Index.

**Currency:** The sub-fund currency is USD. The share class currency is USD.

**Dealing Frequency:** You may redeem your investment daily by selling your shares through a broker on a stock exchange where the shares are traded. In normal circumstances, only Authorised Participants (certain financial institutions) may subscribe or redeem shares directly with the fund.

**Distribution Policy:** This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

**Depositary:** J.P. Morgan SE – Dublin Branch

### Intended retail investor

The fund may be suitable for investors who are more concerned with maximising long term returns than minimising possible short-term losses. The fund is intended for retail investors who have a basic investment knowledge and an ability to bear large short-term losses. This investment should form part of a varied investment portfolio. This fund is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

You can get further information about this fund, including the prospectus, latest annual report, any subsequent half-yearly report and the latest price of shares from the fund's management company at 5, rue Höhenhof, L-1736 Senningerberg, Luxembourg, and from [www.schroders.com/kiids](http://www.schroders.com/kiids). What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios

We have classified this product as 4 out of 7, which is a medium risk class. The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Be aware of currency risk. In some circumstances you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

You can find more information about the other risks in the prospectus at [www.schroders.com](http://www.schroders.com).

shown are illustrations based on results from the past and on certain assumptions.

The stress scenario shows what you might get back in extreme market circumstances.

The Unfavourable scenario was simulated based on the appropriate benchmark used for an investment between 09 2024 to 10 2025

The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 07 2019 to 07 2024

The Favourable scenario was simulated based on the appropriate benchmark used for an investment between 03 2020 to 03 2025

## What happens if Schroder Investment Management Limited is unable to pay out?

The fund's assets are held in safekeeping by its depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A. In addition, the fund's assets are segregated from the depositary's assets, which limits the risk of the fund suffering loss in case of default or insolvency of the depositary or someone acting on its behalf. However in the event of any loss, there is no compensation or guarantee scheme in place which may offset such loss.

## What are the costs?

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

	If you exit after 1 year	If you exit after 5 years
Total costs	USD 45	USD 384
Annual cost impact (*)	0.5%	0.5% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11,5 % before costs and 11,0 % after costs.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
