#### 1. What is this product ?

**Product Type :** The Fund is a passively managed Undertaking for Collective Investment in Transferable Securities (UCITS) in the form of an Exchange Traded Fund (ETF) under Luxembourg law, constituted as a sub-fund of a Société d'Investissement à Capital Variable (SICAV).

**Maturity :** This product has no specific maturity date. However, this product may be dissolved or merged, in which case you will be informed by any appropriate means provided for by the regulations.

**Objectives :** The investment objective of Barclays Quantic Global E NR (the "Fund") is to replicate, before the Fund's fees and expenses, the performance of the Barclays Quantic Global E Index (the "Index", ticker: BXIIQUAE) closing level. The Index is expressed in EUR. The Index is calculated by Solactive AG and published by Barclays Bank PLC (the "Index Provider"). For a detailed description of the Index, please see section "Description of the Index" of the Prospectus. The Index invests in global developed market stocks, selected based on the highest fundamental scores provided by Quantic and on their environmental risk rating from Sustainalytics, as mentioned in the "Index Methodology" hereinafter. Quantic uses their model to bi-monthly send signals for the Index to be calculated, the Index is fully rules-based. The replicated Index is net of fees. The anticipated level of tracking error in normal conditions is 1.00% over a one-year period.

**Investment Policy :** In order to achieve its investment objective, the Fund will use a combination of swaps with the objective of tracking the Index performance through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance, or the value of which will be exchanged against the performance or the value of the Index or a related index, or a portfolio of its constituents through a combination of swap agreements with a swap counterparty. This method implies a counterparty risk as described in the Risk and Reward Profile section in the Prospectus. The net asset value per share of the Fund will therefore increase (or decrease) according to the evolution of the Index. The counterparty to the swaps will be a first-class financial institution that specialises in this type of transaction. In addition and on an ancillary basis, the Fund may use other derivatives for hedging and investment purposes, as described under "Use of Derivatives, Special Investment and Hedging Techniques" in the Prospectus. The Reference Currency of the Fund is the Euro.

**Allocation of distributable amounts :** Capitalization.

**Intended Investors :** The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund.

**Depositary :** State Street Bank International GmbH, Luxembourg Branch.

**Additional information :** The Fund's prospectus and annual and semi-annual reports are available on the management company's website and free of charge on written request to [info@ossiam.com](mailto:info@ossiam.com). The net asset value is available on the management company's website. [www.ossiam.com](http://www.ossiam.com)
