Objectives

Investment objective To increase the value of your investment over time by tracking the performance of the J.P. Morgan ESG Tilted EMU Government Bond 1-10 Year Index®.

Benchmark(s) J.P. Morgan ESG Tilted EMU Government Bond 1-10 Year Index® (the "Index"). For designing the portfolio and measuring performance.

The Index aims to track the performance of eligible fixed-rate, euro-denominated domestic government debt issued by Eurozone countries with time to maturity between 6 months and 10 years. The Index currently includes liquid government bonds issued by Austria, Belgium, Finland, France, Germany, Ireland, Italy, Netherlands, Portugal and Spain.

Starting from J.P. Morgan EMU Government Bond 1-10 Year Index® (the "Parent Index"), the Index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight or remove issuers that rank lower.

The Index is a total return index, meaning that it calculates the performance of the constituents on the basis that any dividends or distributions are reinvested.

The Index is published and calculated by J.P. Morgan Securities PLC, acting as benchmark administrator. The Index rebalances quarterly at the following dates: January month-end, April month-end, July month-end and October month-end. This quarterly rebalance only applies to JESG score®/band changes; composition and reference data changes in the Parent Index as a result of capital market activity (e.g. new bonds, taps, tenders etc.) will be reflected on a monthly basis (end-of-month rebalance). Index rebalancing are implemented in Fund's portfolio in order to avoid deviation from the Index performance. The costs of rebalancing the Fund's portfolio will depend on the Index turnover and the transactions costs of trading the underlying securities. Rebalancing costs will impact negatively the Fund's performance.

For more information on the benchmark, go to J.P. Morgan ESG Tilted EMU Government Bond 1-10 Year Index.

Investment policies The fund mainly invests in government bonds denominated in euro issued by Eurozone countries. The fund generally favours direct investment but may at times invest through derivatives. Specifically, the fund normally invests at least 90% of total net assets in debt and debt-related instruments, including money market instruments, issued by issuers that are included in the benchmark. The credit rating and duration of securities are usually consistent with those of the benchmark.

The fund may also invest in securities that are not constituents of the benchmark where such securities offer a risk and return profile that is similar to that of some constituents of the benchmark. The exposure to the benchmark is mainly achieved through physical replication.

The fund may invest in the following asset classes up to the percentages of total net assets indicated:

- corporate bonds: 10%
- deposits in any currency: 10%
- units of UCITS and other UCIs: 10%

Tracking error Maximum, 0.50% (in normal market conditions)

Derivatives and techniques The fund may use derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure.

Securities lending Expected, 40%; maximum, 70%.

Strategy The fund is passively managed. In tracking the performance of the benchmark, the investment manager invests similarly to the benchmark through a combination of quantitative and discretionary approaches. Using market and economic sector analysis and statistical models, the investment manager may over- or underweight certain benchmark's constituents and may invest in securities which are not benchmark's constituents (Optimized sampling). However, from time to time the fund may hold all constituents of the benchmark.

Distribution Policy This Share Class is not distributing dividends. Income from investments is reinvested.

Other information The fund promotes (E) environmental and/or (S) social characteristics and invests in assets following good governance (G) practices in accordance with article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"). For more information, see "SFDR Pre-contractual disclosures" attached to the Prospectus.

Intended retail investor

The fund is available to professional investors and investors with basic knowledge, with or without advice.

Investors who understand the risks of the fund and plan to invest over a recommended holding period of 4 years.

The fund may appeal to investors who are looking for an investment combining income and growth, while favouring ESG/SRI investing and are interested in exposure to developed bond markets, either for a core investment or for diversification purposes.

Practical information

Depository The fund depository is State Street Bank International GmbH, Luxembourg Branch.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the Management Company to pay you.

This fund does not offer any form of capital protection against future negative market conditions and, as a consequence, you may lose part of or the entire amount originally invested.

If the fund is not able to pay you out what is due, you may lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product/a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between September 2019 and September 2023.

Moderate: this type of scenario occurred for an investment between April 2021 and April 2025.

Favourable: this type of scenario occurred for an investment between January 2017 and January 2021.

What happens if Eurizon Capital SGR S.p.A. - Luxembourg Branch is unable to pay out?

If the fund is not able to pay you out what is due, you may lose your entire investment. No investor guarantee nor compensation scheme is foreseen in that eventuality. The fund is treated as a separate entity having its own assets which are distinct in all aspects from the assets of the Management company and the assets of each of the other investors in the fund, as well as from the assets of any other products managed by the Management Company. Obligations entered into on behalf of the fund shall be met solely with the assets of the fund. On the fund's assets, no actions of creditors of the Management Company or creditors acting on its interest, nor actions of creditors of the depositary or sub-depositary or creditors acting in the depositary or sub-depositary's interest, should be allowed. Actions of creditors of an investor in the fund are limited to the positions held in the fund by the concerned investor. The Management Company cannot, in any circumstances, use the assets of the fund for its own interests or those of third parties.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 4 years (recommended holding period)
Total Costs	20 EUR	80 EUR
Annual cost impact*	0.2%	0.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.70% before costs and -0.95% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

Performance fees	There is no performance fee for this product.	0 EUR

(*) These figures do not include any brokerage fees and/or transaction costs to be borne by investors in connection with their dealing on stock exchange(s) for buying or selling shares. These brokerage fees and/or transaction costs are not charged by, or payable to the SICAV nor the Management Company but to the investor own intermediary. These figures do not include primary market transaction costs that may be charged to Authorised Participants.

How long should I hold it and can I take money out early?

Recommended holding period: 4 years

In normal circumstances, investors other than Authorized Participants may not buy or sell shares directly with the SICAV, but must do so - through an intermediary - on one of the stock exchanges where these shares are listed and traded, during the trading hours of the relevant stock exchange. For the list of available stock exchanges, go to eurizon.com.

If you sell your shares before the end of the Recommended Holding Period, this could impact your investment's risk profile and/or performance.
