What is this product?

Type: Naamloze Vennootschap (N.V.) – An investment company with variable capital incorporated under Dutch law.

Objective: Robeco Afrika Fonds is an actively managed fund that invests in stocks in Africa, especially in countries such as South Africa, Egypt, Morocco and Nigeria. The selection of these stocks is based on a fundamental analysis. The fund's objective is to provide long term capital growth. The fund manager selects attractive countries for which economic and political developments are important factors in determining emerging market equity returns and frontier markets. The fund then selects the companies with the best profit potential, taking advantage of growth across the African region. The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, proxy voting and engagement.

What are the risks & what could I get in return?

The risk indicator assumes you keep the product for 7 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level.

Be aware of currency risk. If you receive payments in a currency different to that of your home jurisdiction, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the risk indicator shown. If we are not able to pay you what is owed, you could lose your entire investment. This product does not include any protection from future market performance so you could lose some or all of your investment.

Other relevant risks

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- A derivative counterparty may fail to fulfill its obligations which could result in a loss. Counterparty risk is reduced via the exchange of collateral.
- The fund invests in assets that could become less liquid in certain market conditions, which could have a significant impact on the value of these assets. Investors may face significant difficulties in terms of time or costs for disinvesting subject to specific market conditions.
- A small part of the fund is invested in countries in the Western African Economic Monetary Union. The risk with regards to settlement and loss of assets in these countries is high due to the immaturity of the markets settlement systems and geopolitical climate of those countries.
- For more details about portfolio risks, see Section 4. "Risk Considerations" of the prospectus.

What happens if Robeco is unable to pay out?

The fund's assets are held separately from Robeco Institutional Asset Management B.V. (the "Manager"). A pay-out of the fund's assets is thus not affected by the financial position or potential default of the Manager. The financial instruments in the portfolio of the fund are placed in custody with J.P. Morgan SE, Amsterdam Branch (the "Depository"). The fund runs the risk that its assets placed in custody may be lost as a result of the liquidation, insolvency, bankruptcy, negligence of, or fraudulent activities by, the Depository. In that case the fund may suffer a financial loss. However this risk is mitigated to some extent as the Depository is required by law to keep the fund's assets separate from its own assets. An investor compensation or guarantee scheme is not applicable in case of such financial loss.
